# INTRODUCTION

DegenPad is an innovative, ERC-20 based fundraising platform designed to revolutionize the decentralized finance landscape. We're redefining the game with our exclusive launchpad, specifically tailored for the audacious and daring - the 'degens'. Our platform offers a unique space where you can invest securely in the newest, trendiest projects that boast immense potential on the Ethereum network.

DegenPad combines expertise, cutting-edge technology, and a deep understanding of the blockchain sector to deliver an unparalleled investment experience. We're on a mission to make access to high-potential projects easier, safer, and more intuitive.

Our platform is not just a launchpad, but also a comprehensive ecosystem of DeFi services. Along with facilitating project launches, DegenPad offers a robust staking pool, an innovative approach to NFT staking, and lucrative farming opportunities. Each feature is designed to maximize the value for our users, fostering a thriving community and dynamic growth.

But DegenPad is more than just its features; it's a vision for a more inclusive, profitable, and exciting DeFi future. By aligning with DegenPad, you're not just stepping into a new platform - you're becoming part of a movement seeking to shape the future of decentralized finance.

# WHAT'S DEGANPAD?

Degenpad offers a diverse ecosystem with various utilities where degens are the kings.

We provide different passive income opportunities where you can simply stake \$DPAD tokens. Our mission is to create a safe place for potential projects that are selected through rigorous checks, ensuring complete safety for both investors and project teams. Through Degenpad, we aim to pioneer various technologies, allowing our holders to test beta versions before releasing them to the public.

We are a team of individuals committed to creating a better space for one sole purpose: to eliminate all the bad players in the industry by offering a secure environment using our utilities.

Welcome to the future of Launchpads – Degenpad!

# OUR UTILITIES

## LAUNCHPAD TIERS

We are implementing a tier system on our Launchpad that will enable our token holders to automatically whitelist for hyped presales. This model will support holding the \$DPAD token, which is the cornerstone of our ecosystem. The higher amount of \$DPAD tokens you hold, the greater your chances of being among the first to participate in our beta testing, receive rewards, and whitelist presales. Our tiers are divided into four levels: Bronze, Silver, Gold, and Platinum.

## STAKING POOL

We are offering a chance to earn passive income through our exclusive Staking Pool. You can simply stake your tokens in our pool to earn rewards in \$DPAD. We offer competitive high-yield returns and higher APYs, ensuring more income opportunities for all our holders who love to stake their tokens for a greater yield. \$DPAD offers a comprehensive staking protocol, which means our auto-staking feature will allow you to stake \$DPAD tokens within a few simple clicks.

# OUR UTILITIES

## NFT STAKING

Non-fungible assets (NFTs) have been dominating this space since their inception and can earn you passive yields. We have curated a collection of NFTs to establish a yield generation protocol. Limited edition NFTs will be released that can be staked in our protocol, earning higher rewards in \$DPAD tokens. Each NFT will hold a different value, allowing you to earn more rewards if you stake NFTs with higher value.

This creates a new passive income opportunity for all those who own our limited edition NFTs.

## FARM

We have seen a growing number of users in DeFi yield farming. Aave, Yearn Finance, and Compound are some of the popular DeFi farms available at the moment. We are joining the race by introducing DFARM where we allow our users to add liquidity to our pool which helps generate rewards in the form of \$DPAD tokens

# WHY DPAD?

The utility functions of DegenPad create a synergistic ecosystem that propels the platform's growth. The Launchpad attracts innovative projects and their communities, expanding the user base and enhancing platform engagement. Staking and farming incentivize users to hold and transact with DPAD, boosting the token's liquidity and stability. NFT Staking, a unique feature, provides users with additional means of earning, driving further interaction with the platform. Together, these features create a dynamic environment that fuels the platform's continuous growth and sustains the token's value.

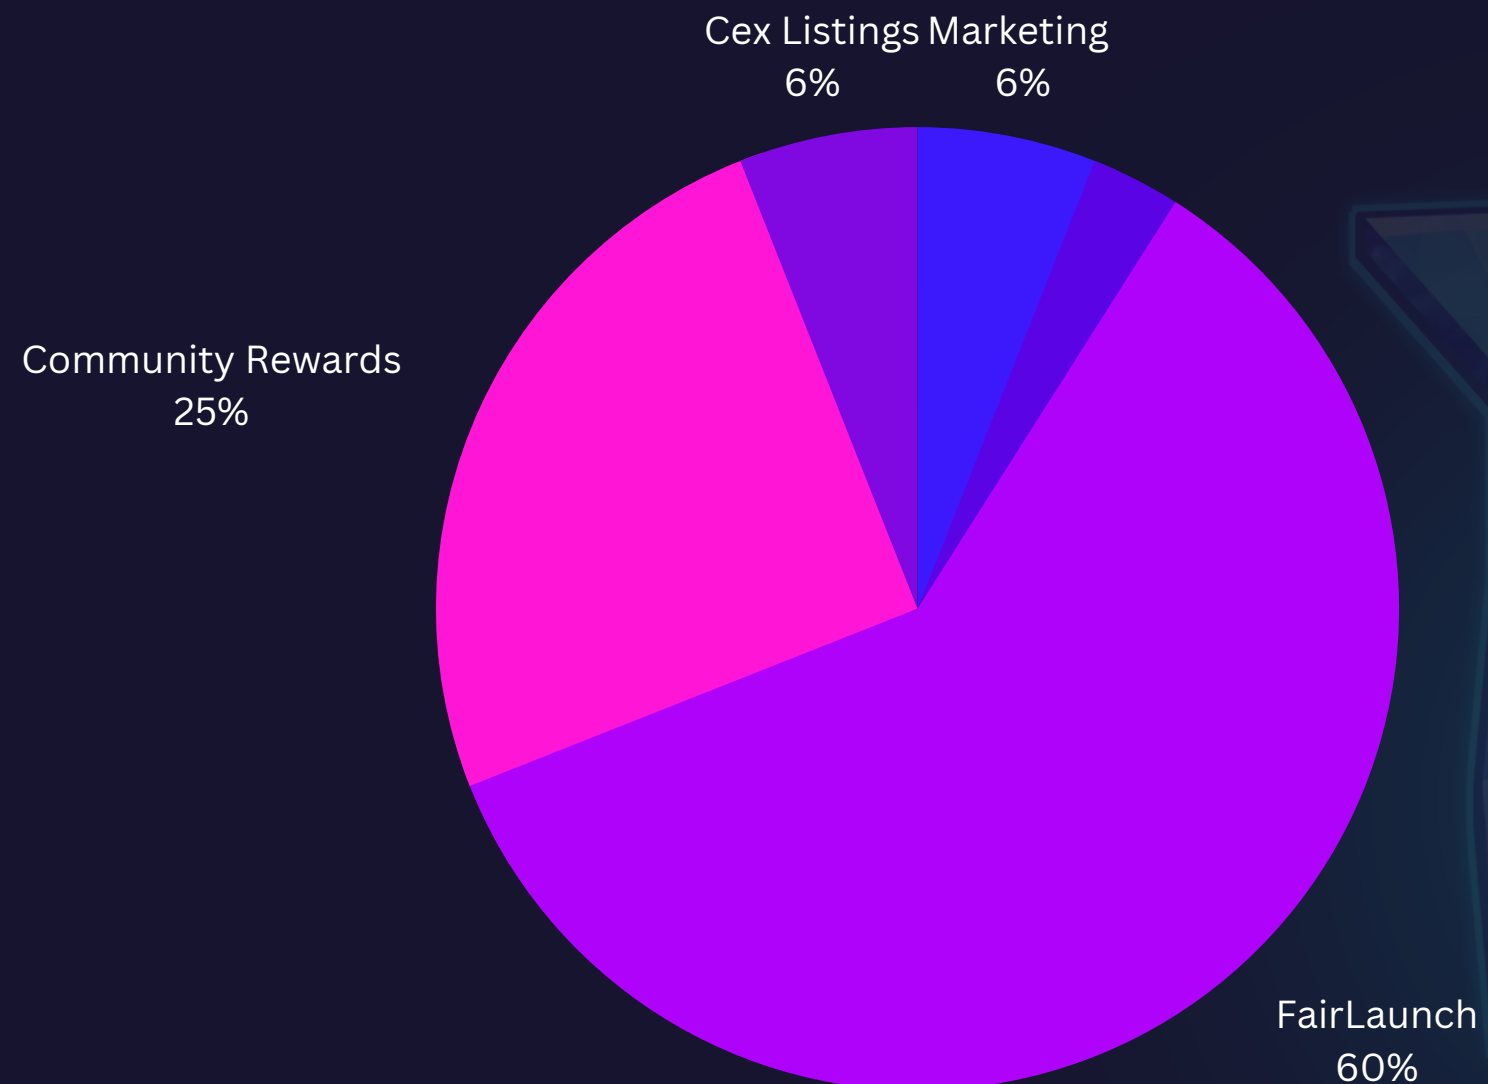

# \$DPAD TOKEN

The total supply of \$DPAD is 1Billion. This is a fixed supply, there will be no \$DPAD minted. The \$DPAD token has been created and the total supply can be verified at Etherscan.

## \$DPAD DISTRIBUTION

Marketing - 6%  
Community Reward - 25%  
fairLaunch - 60%  
Airdrop - 3%  
Cex Listings - 6%

# LAUNCHPAD TIERS

## BRONZE

50,000 \$DPAD  
Total Allocation 10%

## SILVER

75,000 \$DPAD  
Total Allocation: 15%

## GOLD

150,000 \$DPAD  
Total Allocation: 25%

## PLANTINUM

250,000 \$DPAD  
Total Allocation: 50%

# TIERS EXPLAINED

Example: We have \$100k allocated total for the next IDO! Bronze will get 10% shared amongst all Bronze Tier holders. Silver will get 15% shared amongst all Silver Tier holders. Gold will get 25% shared amongst all Gold Tier holders. Platinum will get 50% shared amongst all Platinum Tier holders.

# DISCLAIMER

By introducing a tier system, you can earn rewards simply by staking \$DPAD tokens. Additionally, you can receive free allocations for whitelisted IDO's that launch through our platform. There are only a few Launchpads that allow users to double their rewards and allocations simultaneously. This is why a smart investor always chooses DegenPad over other options.

# HOW TO PARTICIPATE IN IDO

Participating in an IDO (Initial DEX Offering) for a fundraising launchpad such as Degenpad can be an exciting and potentially lucrative opportunity. Here are some steps to consider when participating in an IDO for Degenpad:

First, make sure you have enough funds to participate. In most cases, IDOs require investing in a specific token, so make sure you have that available.

Do your research about the project and the team behind it. Read the whitepaper and attempt to understand the project's goals, roadmap, and potential. Make sure the team has a good reputation, experience in the industry, and a clear vision for their project.

Next, identify when the IDO will occur and determine how much you want to invest. Some IDOs may have minimum investment requirements or maximum caps, so be aware of those restrictions.

When the IDO begins, make sure to move forward quickly and participate in the launch. Check the gas fees and ensure you are comfortable with the fees associated with the transaction.

Finally, monitor your investment after the IDO is over. Keep track of the progress the project is making, as well as any updates or milestones that the team achieves. This can help you decide whether to hold or sell your investment.

Overall, participating in an IDO for Degenpad can be a great opportunity but it's important to do your research and invest carefully
